

Anatomage
TABLE 5

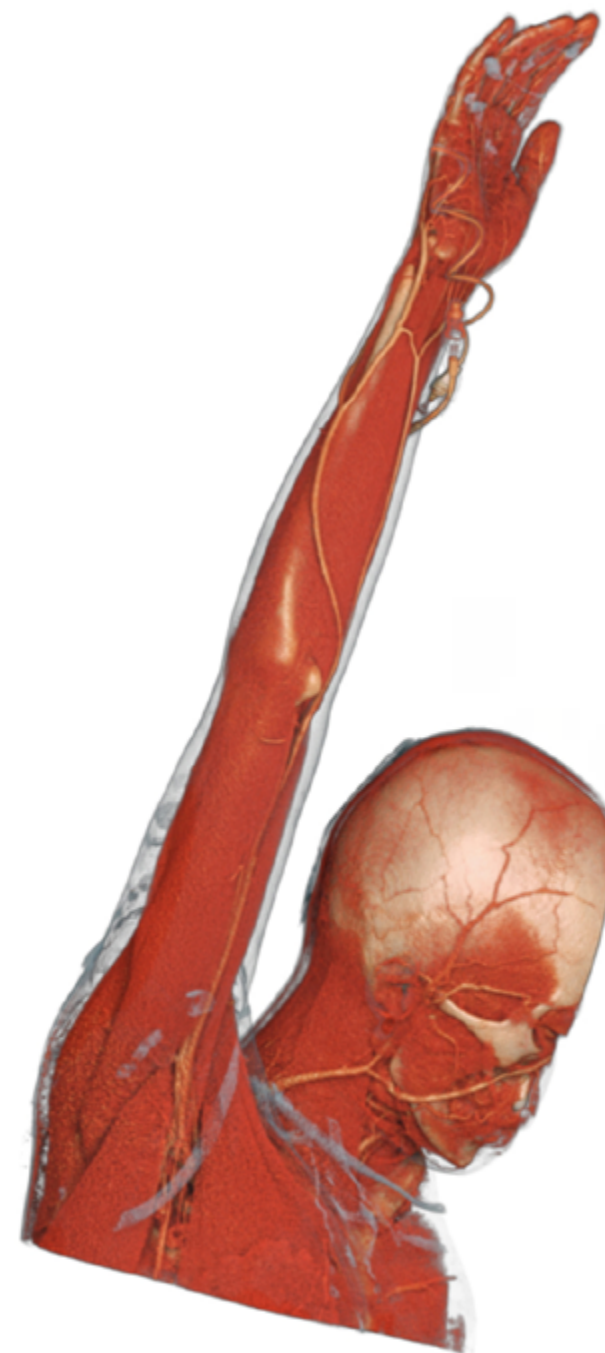

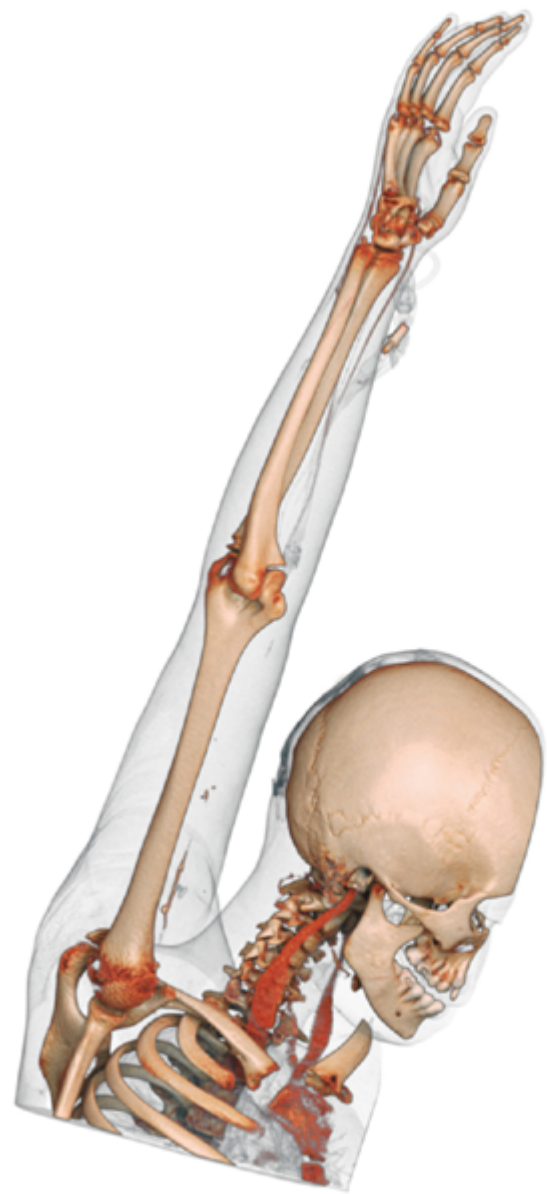

Real Human Anatomy Digitally Restored.

We have released our best ever Anatomage Table. Table 5 is our highest quality imaging software for viewing real human anatomy. New ultra-high quality (UHQ) visualization is available for all clinical cases and loaded scans.

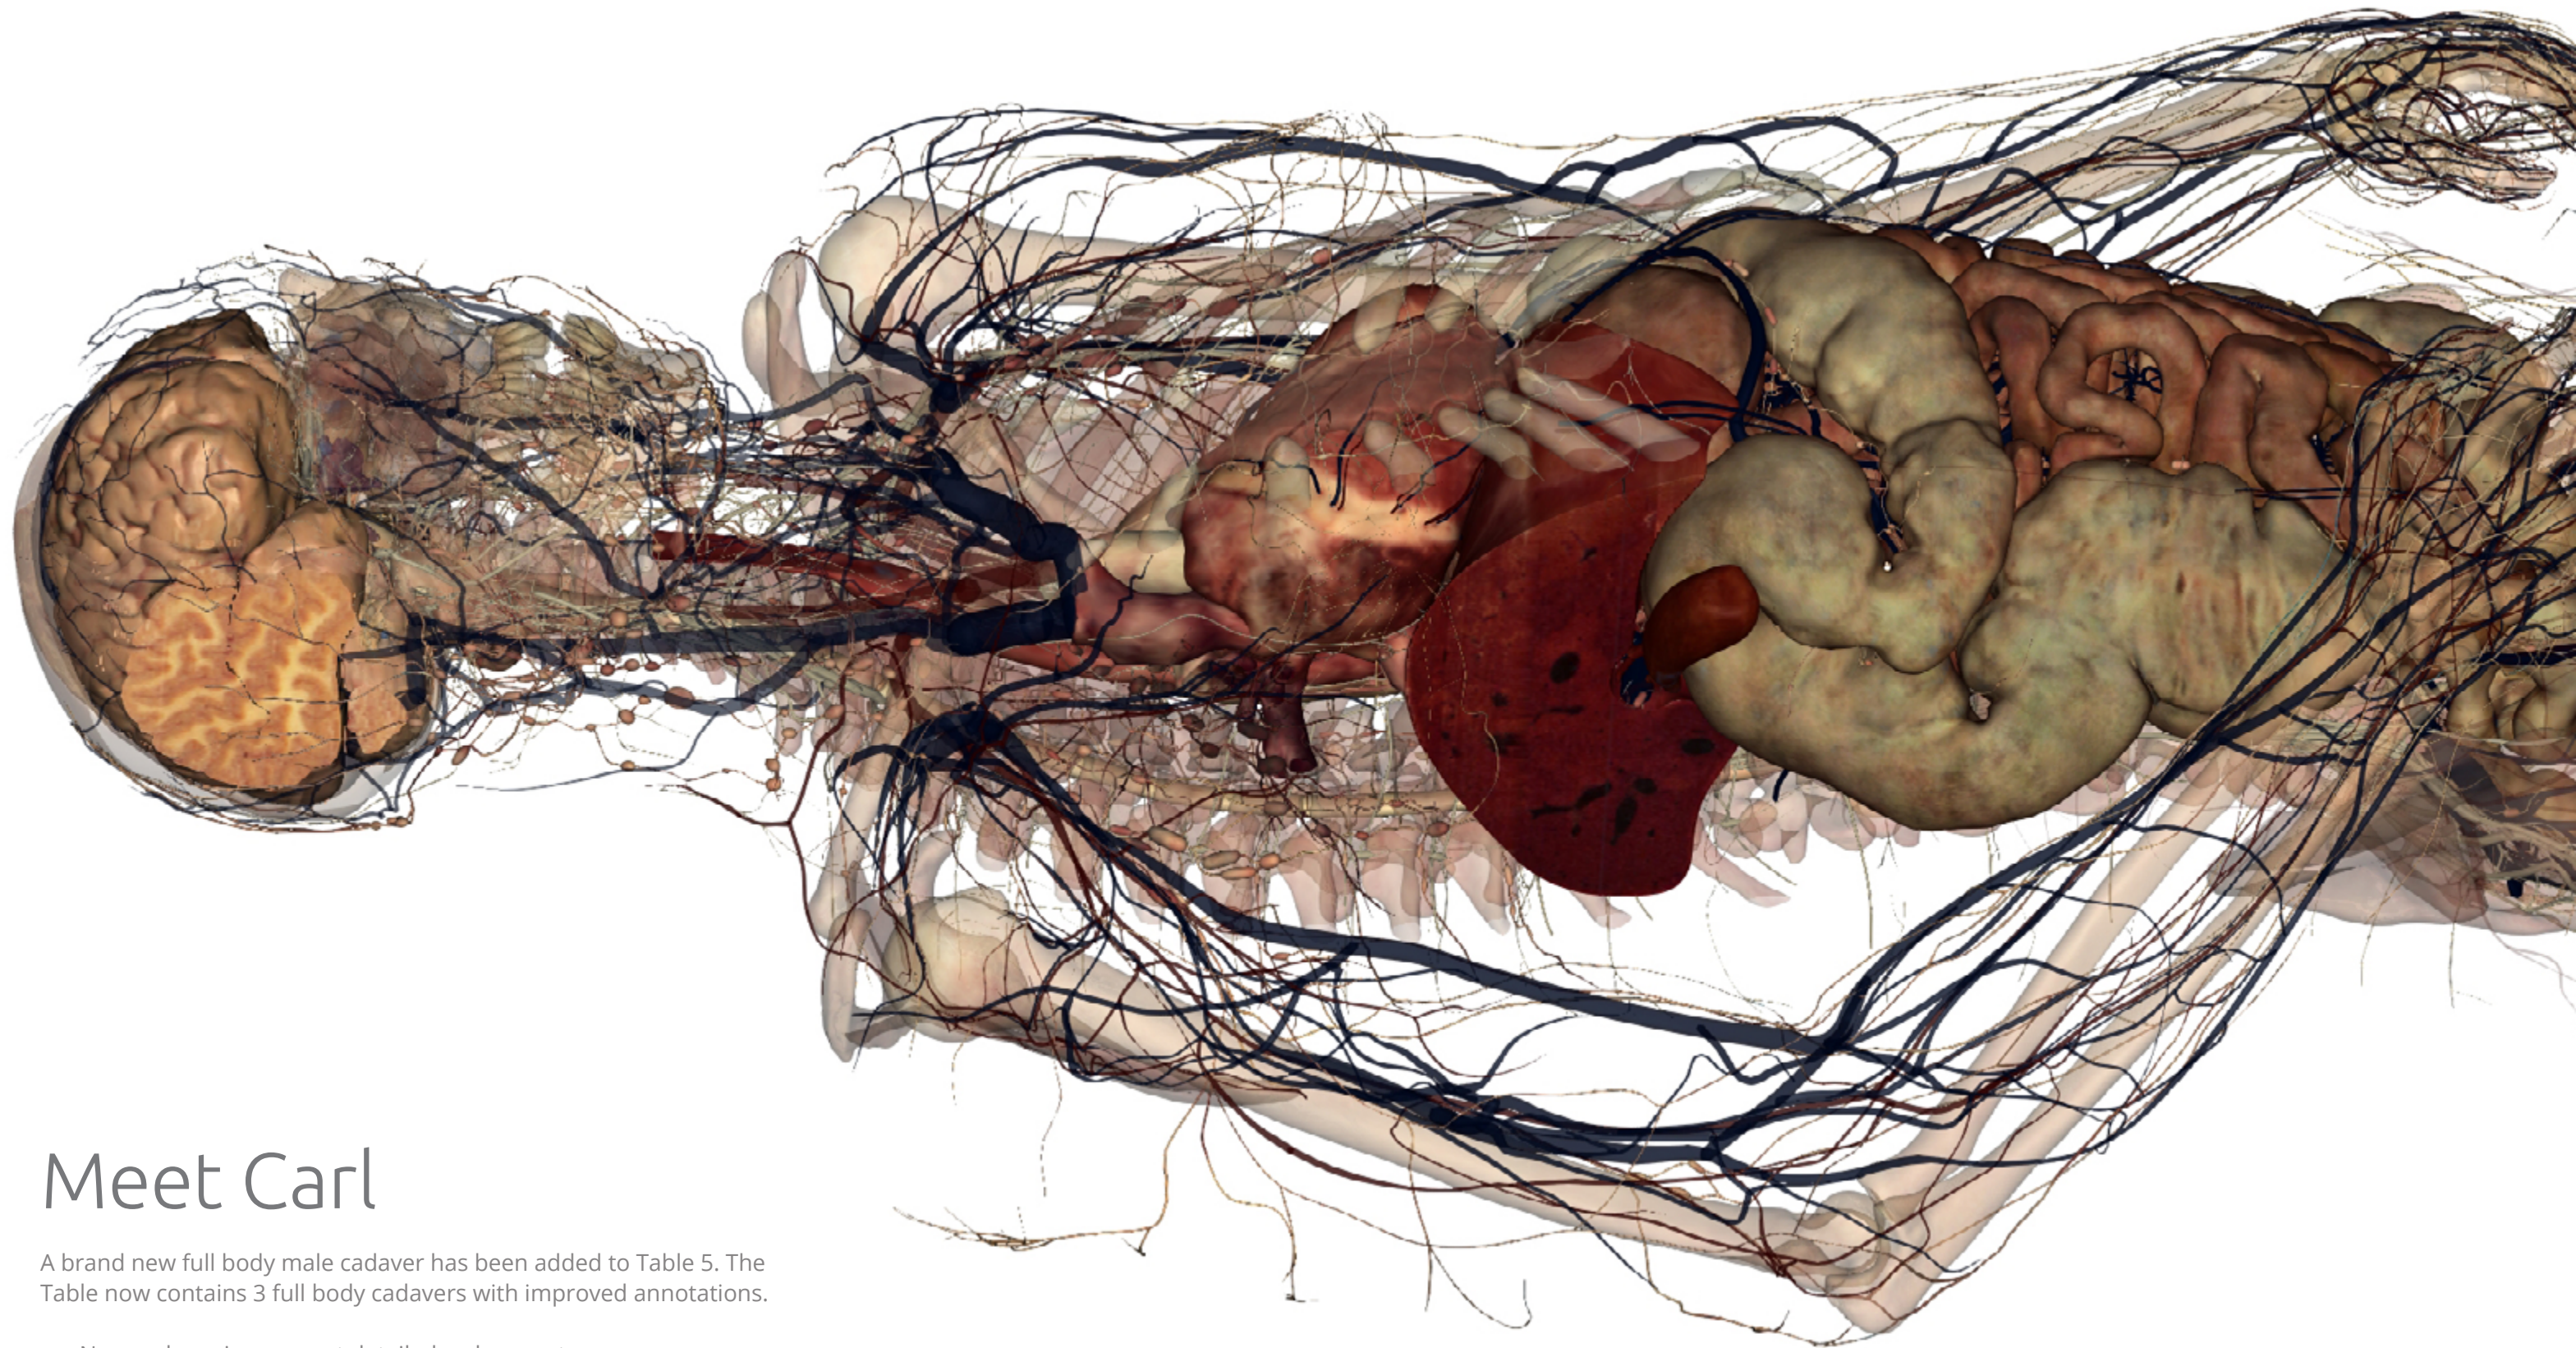

- Photorealistic portrayal of human anatomy
- Significantly improved segmentation of full-body cadavers
- Great detail and visual accuracy with regional scans

Ultra High Quality

Seeing images in UHQ lets users view anatomy in high-definition. View soft and hard tissue in every region of the body in vivid detail.

- Quality 3D images to visualize patient scans and pathology
- Soft and hard tissue shown with realistic coloring
- New Craniotomy Tool to dissect through the skull & view the brain surface

Meet Carl

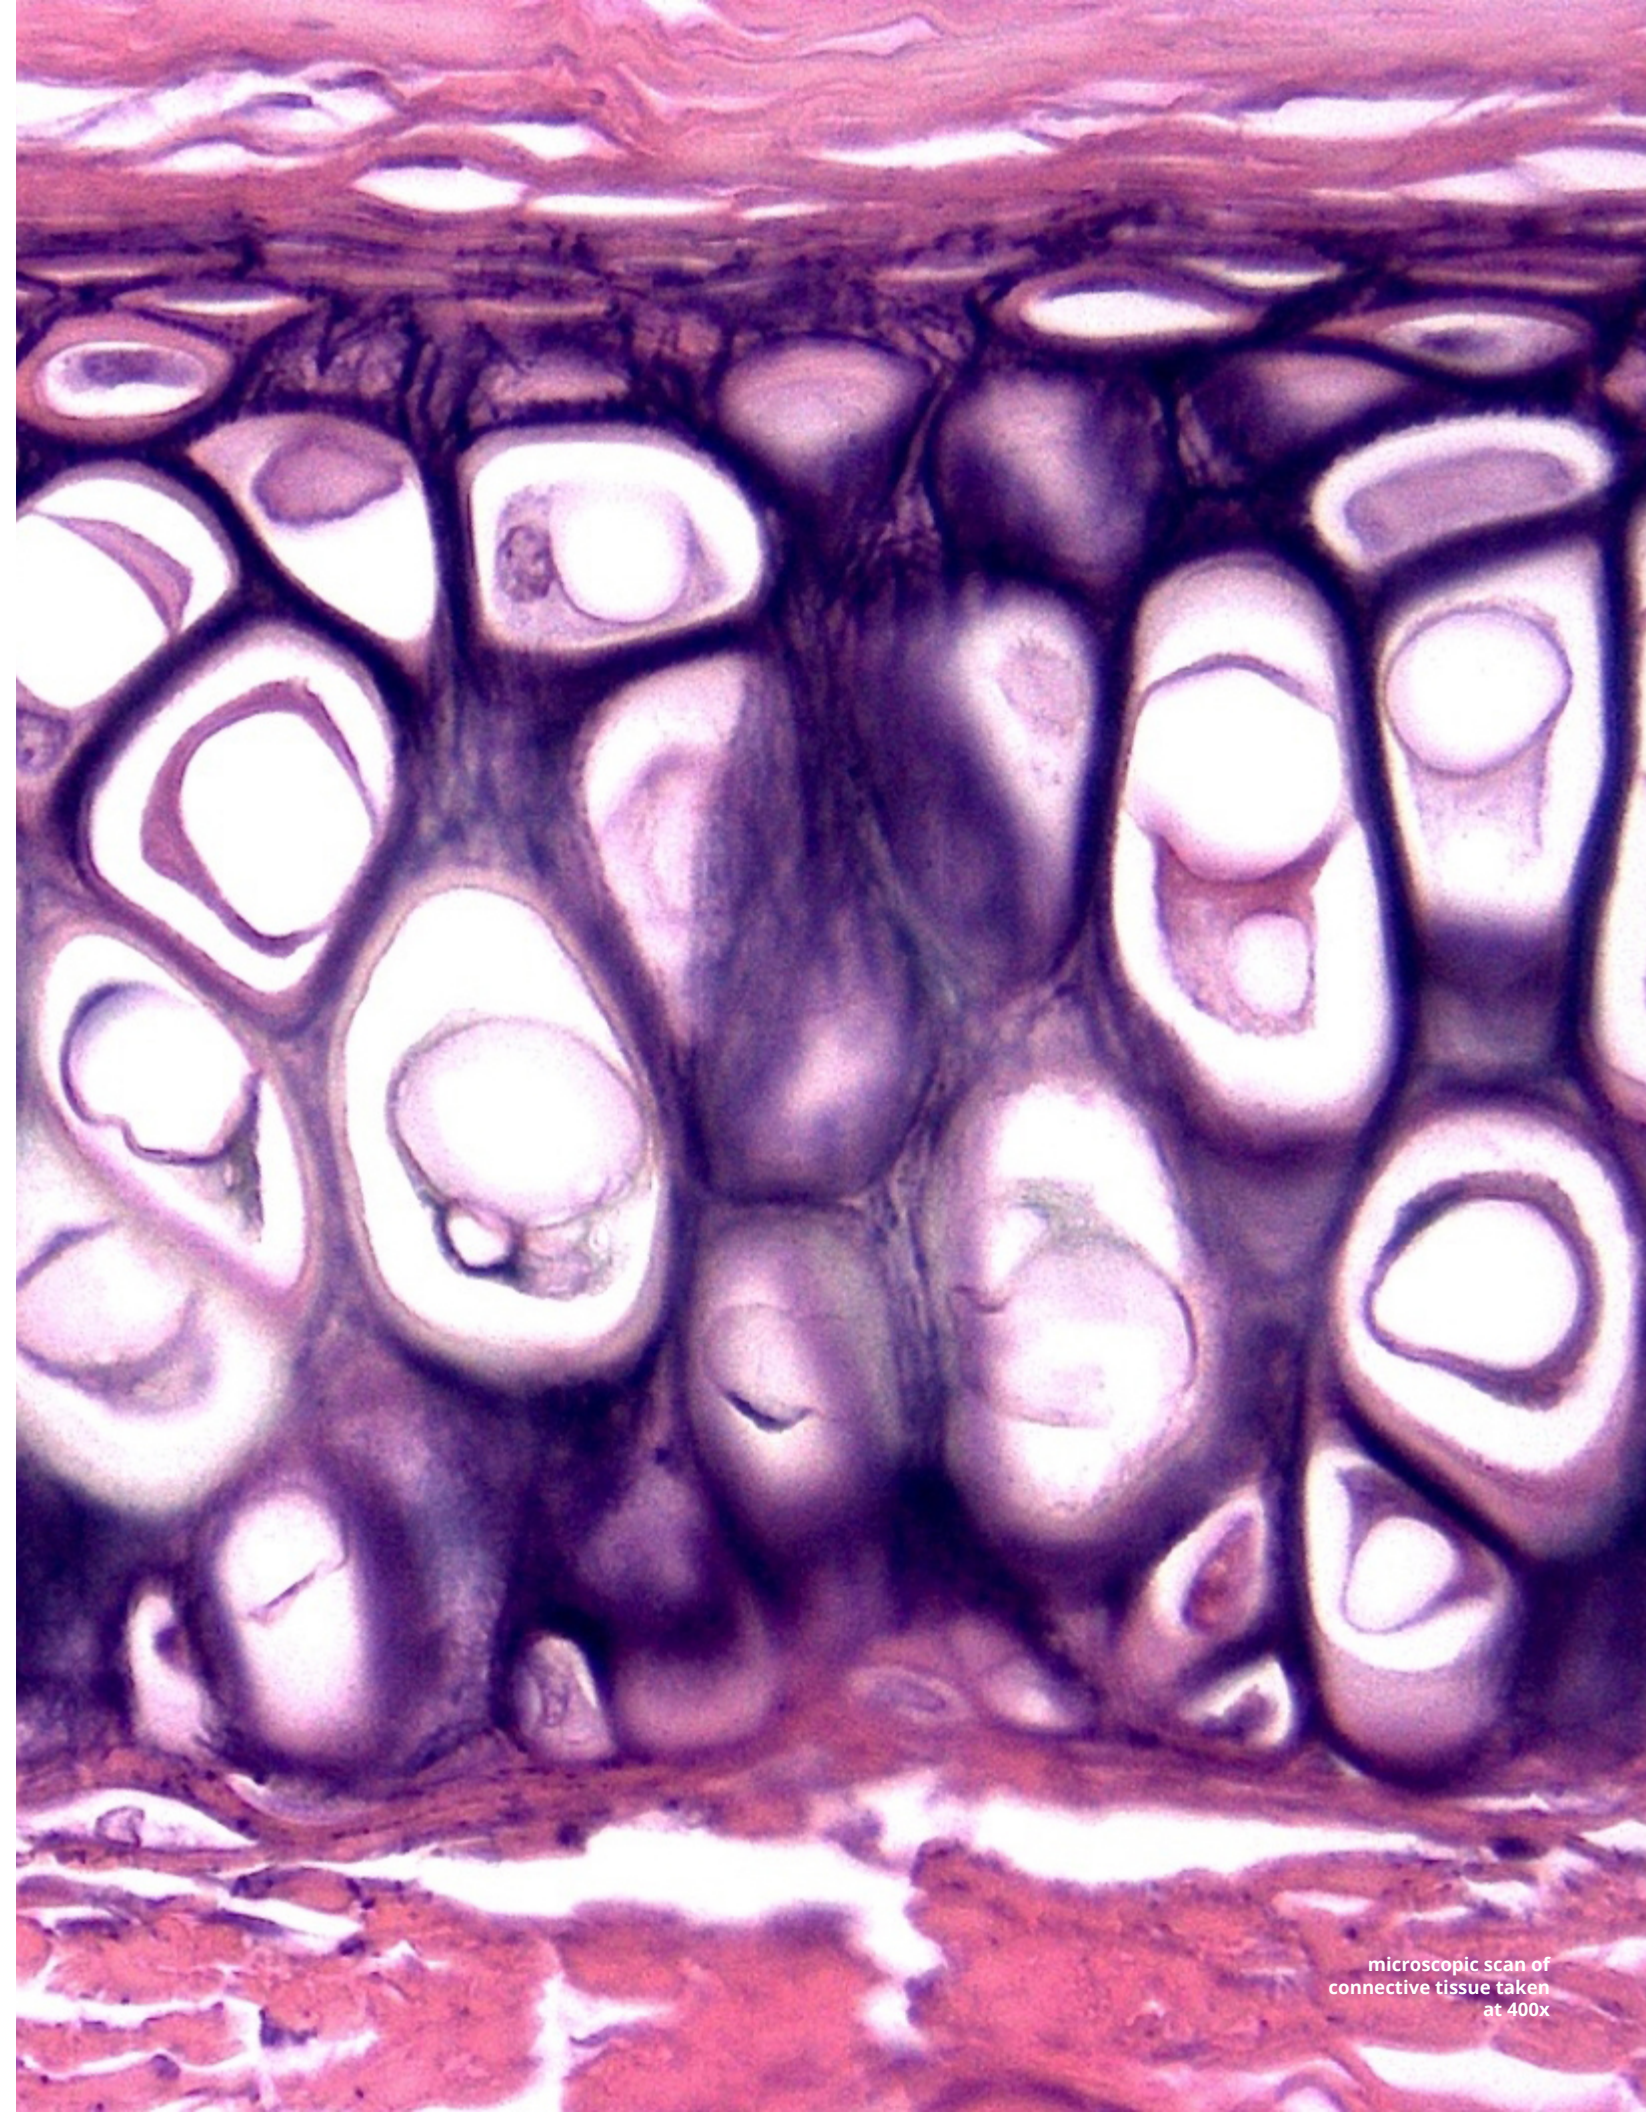

A brand new full body male cadaver has been added to Table 5. The Table now contains 3 full body cadavers with improved annotations.

- New cadaver is our most detailed cadaver yet
- Superior muscular definition for anatomical comparison
- Vibrant view of cardiovascular systems

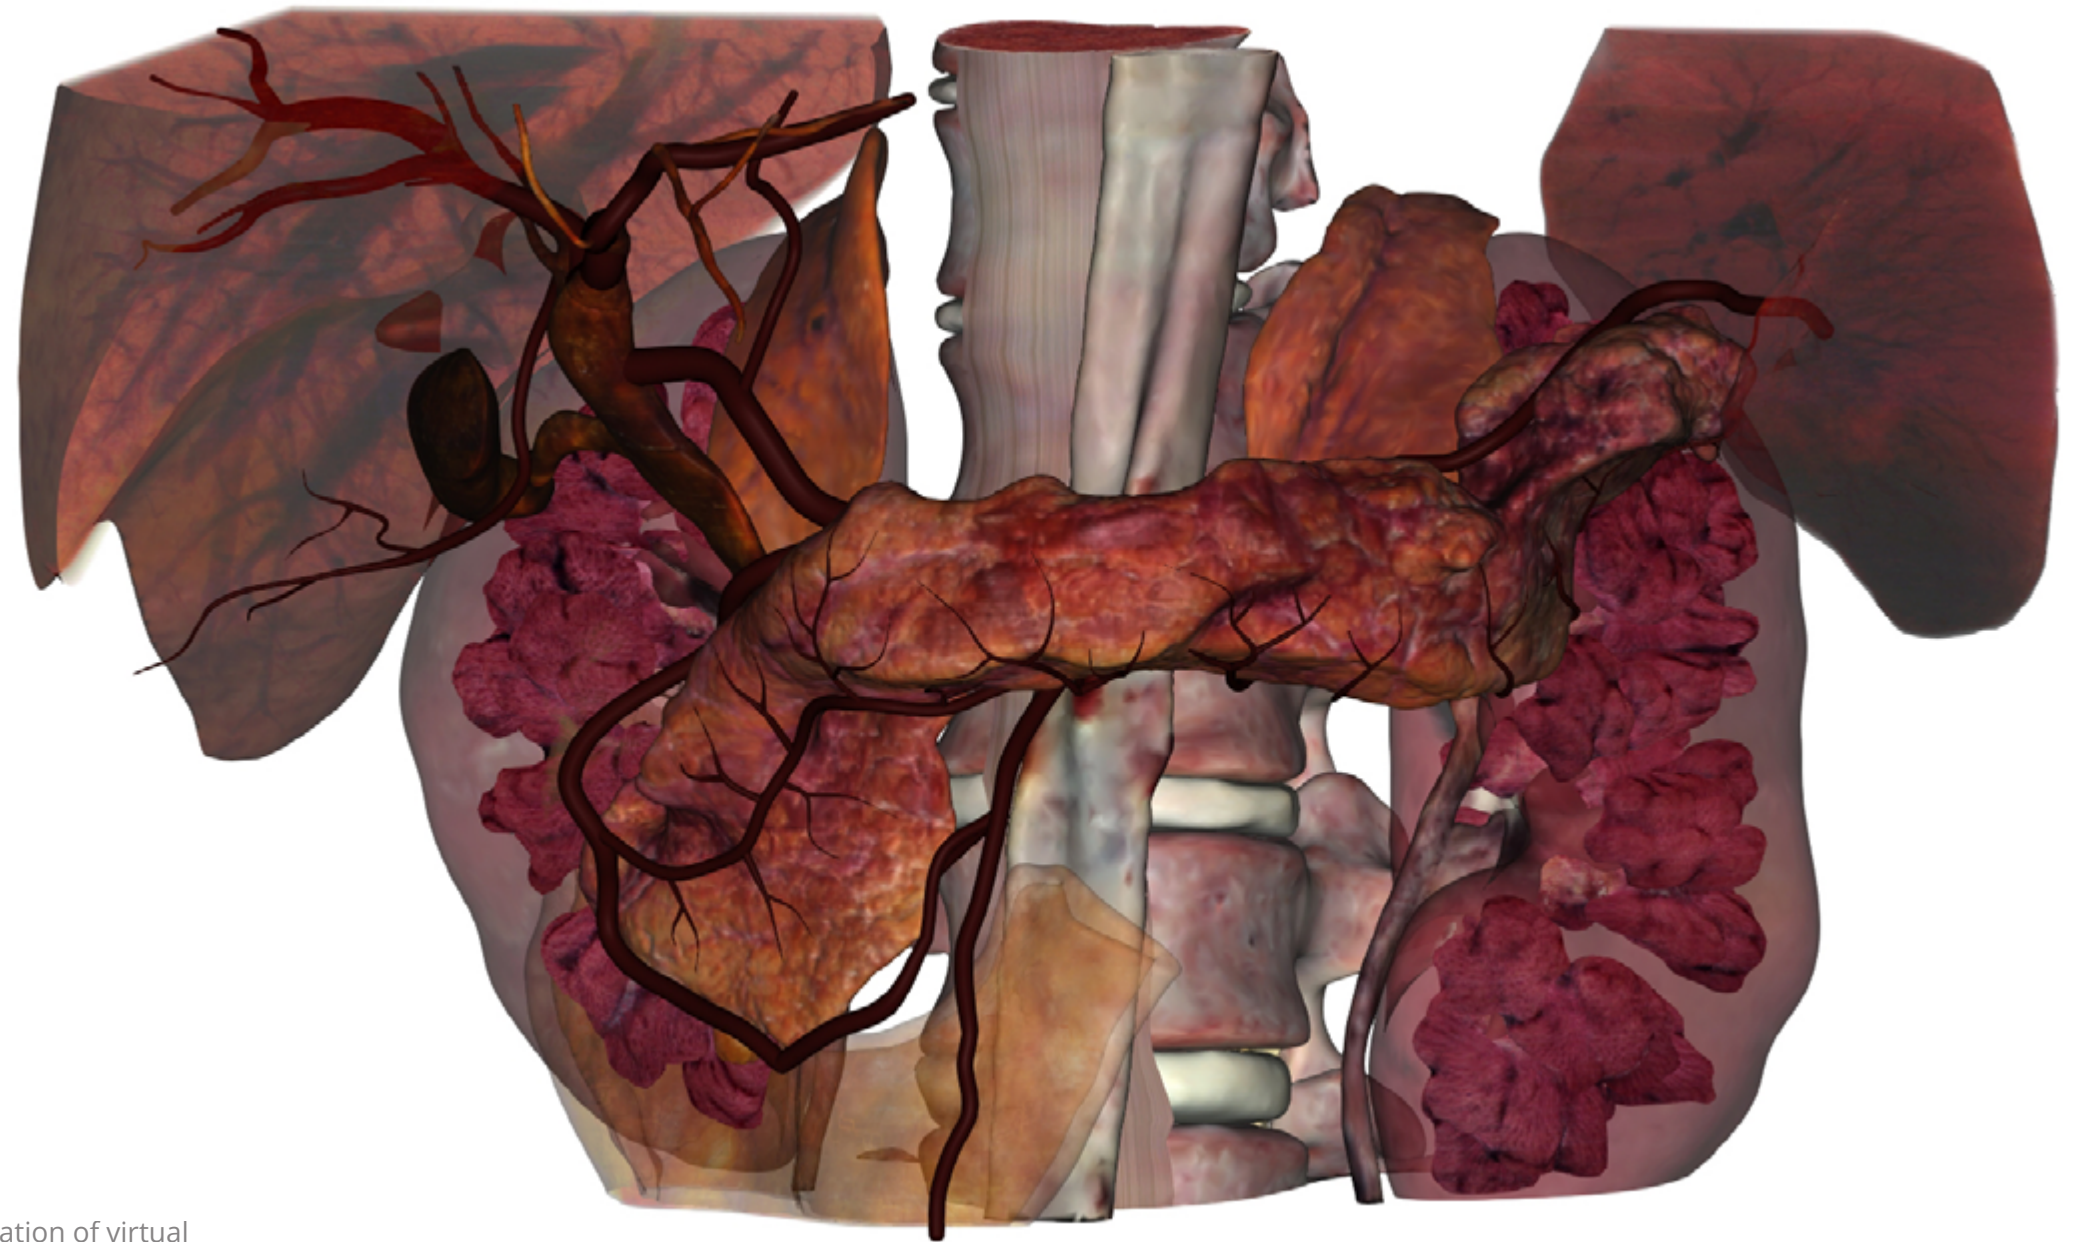

Histology Scans

The Table library now has over 1,400 entries. Table 5 also has a new category for histology scans to view microscopic tissue structures.

- 800 new entries added to case library
- Improved full body cat cadaver scan
- Customizable comparison cases

More Tools

Table 5 has new features for dissection and exploration of virtual anatomy. The Table now has a variety of dissection, highlighting, and note taking tools.

- Dissection Tool to highlight and dissect through single structures one at a time
- Pen Tool to add text and arrow marker notes
- Explorer Tool to animate blood flow in any artery or vein in the body
