

Anatomage
TABLE

1st European
**Users Group
Meeting 2019**

11-12 October, 2019
Health House, Leuven (BE)

About Table UGM 2019

The European Anatomage Table Users Group Meeting aims to explore and maximize the values of the Anatomage Table, while promoting the spreading of virtual application technologies through the generation of a networking platform. Attendees will have the chance to attend useful and collaborative hands-on with the Anatomage Team to better contextualise each tool of the new release Table 7.

Keynote speakers – Prof. Dr. Brand-Saberi, Dr. Moyes, and Prof. Macchiarelli - will present their strategy of teaching using the Anatomage Table and will perform an interactive workshop to show the peculiar features that enabled the enrichment of their Curriculum.

At the Anatomage Table Users Group Meeting, guests are encouraged to meet with like-minded individuals and share teaching methodologies. Specifically the attendees will be able to:

- Receive multiple hands-on sessions
- Attend lectures led by experts in their field
- Share ideas with other Table users
- Give feedback about the Table

Registration

Regular registration fees are 250€ per attendee. A discount is offered in case of multiple attendees. Please [click here](#) to register & refer to the email for payment.

Travel Details

Anatomage recommends flying into the Brussels Airport - Zaventem which enables to reach Leuven in 20 minutes by train.

Accommodation

With regard to possible accommodations, we suggest to choose one of the following Hotels in the city centre of Leuven:

[Ibis Leuven Centrum](#)

[Pentahotel](#)

[Hotel The Fourth](#)

Guest Speakers

Prof. Dr. Beate Brand-Saberi

Professor Dr. Beate Brand-Saberi, Head of Department Anatomy and Molecular Embryology. Designated Executive Director of the Institute of Anatomy (October 1st, 2019 to September 30th, 2021), in charge of the Hinrichsen collection of human embryos and fetuses.

Dr. Siobhan Moyes

Dr Siobhan Moyes is the Lead in Anatomy and Histology at the University of Plymouth's Peninsula Medical School (PMS). PMS runs a constructively-aligned, integrated curriculum, focusing on surface anatomy, medical imaging and virtual dissection, without cadavers. Siobhan has integrated the Anatomage system to create a dynamic, innovative learning environment, students actively engage with.

Prof. Guido Macchiarelli

Prof. Guido Macchiarelli, MD and Specialist in Cardiology, Full Professor and Chair of Human Anatomy; Director of the Department of Life, Health and Environmental Sciences and Dean of the Medical School, University of L'Aquila, Italy. President of the *International Committee of Symposia of Morphological Sciences*.
